

OMNIVISER

Pitch Deck

06.2024

Empowering Executives with AI-Driven Decision Intelligence

OMNIVISER transforms decision-making by providing real-time, actionable insights through natural interaction, such as chatting with a colleague. OMNIVISER serves as a strategic AI partner.

INTERACT FROM MOBILE OR DESKTOP

I'm struggling to align our supply chain operations with fluctuating customer demand. How can I improve this?

When orders for industrial pumps spiked 25% at our Jakarta facility. Based on low inventory levels and supplier lead times, I recommend a 35% production increase. This proactive adjustment will boost revenue by 12% while preventing backorders.

Empowering Executives with AI-Driven Decision Intelligence

Providing real-time, actionable insights to optimise processes, lower costs, and increase profitability.

Enabling executives to make confident and clear data-driven decisions.

Combining data from across the organisation to provide a comprehensive view.

The C-Level Challenges

Data overload without the right tools to extract actionable insights

Lack of real-time, cross-functional insights for informed decisions

Isolated departments affecting holistic, data informed decision-making

Pressure to optimise resources, reduce risks, and drive growth

Dynamic markets require agile, data-driven strategies

A groundbreaking AI-based decision support system

Simple connection to data and systems within the organization.

Proprietary algorithms that create personalized and contextual insights.

Provides end-to-end visibility into your organization to make informed decisions.

State-of-the-art AI, Big Data, adaptive learning, and the highest level of security.

Witness the Power of OMNIVISER

Live demo showcasing real-time, data-driven decision-making.

Proprietary AI algorithms and industry-specific data models.

Transformative potential for organizations across sectors.

OMNIVISER: Unrivaled in the Market

Several players in the AI market offer solutions for business intelligence, process optimisation, decision support, while others focus on narrow areas and users.

Examples:

- **igenius.ai:** Business intelligence and reporting for sales
- **vanti.ai:** Manufacturing optimisation
- **Cognyte- Nexyte:** Enterprise Analytics
- **gieni.com:** Predictive analytics for industrial companies
- **Dataiku - Generative AI:** End-to-end AI platforms for model creation

OMNIVISER distinguishes itself by providing non-technical executives an everyday partner in decision-making, without requiring complex technical implementation, allowing for broader market use.

The Explosive Market Opportunity 52%

Enterprise AI Software Market: 25.10B USD in 2023, 204.79B USD by 2028, 52.17% CAGR. ([Mordor Intelligence](#))

Enterprise AI Software Market: 25.10B USD in 2023, 204.79B USD by 2028, 52.17% CAGR. ([Markets and Markets](#))

OMNIVISER is poised to capitalise on the surging demand for AI-powered decision intelligence.

AlaaS: Designed for Scalability and Profitability

We expect a 50% quarter-on-quarter increase in revenue in 2025.

MRR further growth acceleration is predicted as of 2026 Q1 when the full version of the AlaaS auto-deployment product is ready for market introduction.
